Staffing Services

The Right IT People for your Success

Talent for Advancement

The best talent in IT to help achieve corporate goals.

Your IT systems form a critical foundation for every endeavor within your organization. The better your IT personnel, the faster your business can respond to opportunities for growth and profit. Don't leave these crucial hires to chance. Let Ananke's IT specialists introduce you to talent that can support your current business, or take it to the next level and beyond.

Options for Versatility

Ananke Staffing Services offers IT staffing solutions tailored to each client.

Ananke's diverse team of seasoned recruiters brings a wealth of industry experience to the staffing process. We are committed to presenting the right candidate for every position and meeting your organization's needs by offering flexible staffing options.

Our clients range from Fortune 50 corporations with worldwide IT environments to small businesses with a handful of employees.

Fulfillment of Changing Needs

We are there when you need us.

Our team of highly qualified professionals can fill your staffing need on very short notice to keep your operations running smoothly. Whether you need staff for one-time projects or to provide continuity during occasional increases in productivity, Ananke offers the flexibility of contract, temporary, part-time, full time and project-based IT specialists to meet the demands of your business.

Talented Professionals to Power Your Projects

Ananke provides people you can hire with confidence.

Ananke continues to build a pool of qualified information technology specialists to meet our clients' requirements. Through our extensive contacts in the IT industry we have access to the most talented and experienced applicants.

Ananke is a well-known resource providing IT personnel in all major categories:

- Application Development
- IT Infrastructure
- Communications

Our esteemed reputation in the IT field means that you can be certain you will receive the right people to keep your processes and projects operating smoothly.

Selectivity Reduces Risk

Ananke's detailed process ensures viable staffing.

We go well beyond reading resumes to qualify prospective hires. Ananke uses a discreet process and strict guidelines to identify and screen potential candidates. Our goal is to find the right fit for your particular environment. Our satisfied clients have taught us that they need more than just the right technical fit, they need the right personality fit as well.

Not sure what you need? We can help you develop job specifications to achieve your objectives. We develop a thorough understanding of your business and staffing requirements before we begin identifying potential personnel.

We review resumes, check backgrounds, verify education, experience and competencies to narrow the field. Our experienced IT professionals conduct in-depth interviews with top candidates to get a true understanding of their technical knowledge.

Once candidates pass through the rigorous interview process, we will present you with the best candidate for the job, one whose qualifications and personality we feel will best fit your company.

Ananke Aids Large Institution on Short Notice

Case Study

A large financial institution contacted Ananke to replace the current team of engineers doing application packaging. Mid-day Friday the client informed Ananke that they would need a full team of application packaging engineers to start on Monday and begin assuming responsibilities from the outgoing team. Ananke provided an experienced team and were able to hit the ground running first thing that Monday morning. Ananke continues to provide resources that are exceeding the expectations of the client while rebuilding the credibility of the department for delivery-of-service to business units across the company.

Specialization in All IT Areas

We provide the perfect staff for all functions.

Whether your organization has project needs or day-to-day technical needs, Ananke offers efficient and scalable IT staffing solutions. The areas listed below cover the most common technical needs from the majority of our clients. Need a specialist not mentioned here? Please ask.
